Key Insights

- *Marketing campaigns are significantly more effective in Spain compared to other regions.*
- *Customer purchasing activity peaked in 2013 before declining in 2014.*
- *Complaint volume is relatively low compared to total purchases, indicating generally positive customer experience.*
- *Strong purchase volume alongside consistent web traffic indicates healthy customer engagement.*
- *Customers allocate spending disproportionately toward specific product categories.*
- *After strong performance in 2013, the market may have experienced temporary saturation, leading to reduced purchasing activity in 2014.*
- *High dependency on a single country increased business risk, causing overall sales to decline when other regions underperformed.*
